	Révision	002	<div></div>

Within 90 days after this form is sent, the lessor must notify a copy of the duly completed form to the lessee and file proof of such notification in the record of the Tribunal. Where the applicant is the lessor and fails to file such proof of notification in the record of the Tribunal, the application expires and the Tribunal closes the record.

Identification

1Name of lessor

Last name		First name		
No.	Street	Apt.	City / Municipality	Postal code

Necessary information regarding the fixing of the rent

Form in use for the calculation of the rent
for which the amount is to be determined
for the period starting between April 2,
2023 and April 1, 2024.

EXPLANATORY SHEET

You must complete only 1 copy of the form per building, even if there are a number of rents to be fixed.

For each application to fix rent, you must NOTIFY the necessary information form to each lessee appearing on the lease of the dwelling concerned by the application.

The original of this form, duly completed, as well as its proof(s) of notification for each lessee concerned, must be filed with the Tribunal administratif du logement within 90 days following the date on which the form is submitted. With each proof of notification filed with the Tribunal, both the lessee and the case record concerned must be clearly identifiable.

If your form addresses a number of applications, it is important that you clearly indicate on the form the record numbers of all the applications concerned.

Where the applicant is the lessor and fails to file such proof of notification in the record of the Tribunal within that 90-day period, the application expires and the Tribunal closes the record.

If these requirements are met, the Tribunal administratif du logement will summon you to a hearing during which you must be able to provide the accounts and the invoices in support of the amounts that you have entered. However, if you are convened within that time period, you must bring proof of notification to the hearing, if it has not already been filed in the record.

Should there be expenses that apply to non-residential premises, or to certain dwellings only, you will need to be able to provide details in that regard.

If you are a new owner and are unable to obtain the necessary documents, you may ask an administrative judge or a special clerk of the Tribunal to issue a subpoena directing the former owner to appear at the hearing with the documents needed to support your application. The subpoena must be served by a bailiff, at your expense, at least 3 days before the hearing. You can also choose to have your lawyer issue the subpoena.

The term “building” usually means the structure in which is located the dwelling for which the rent is to be fixed. Depending on the case, it could also be a group of adjacent co-managed buildings, a rooming house, a mobile home park or a dwelling held in divided co-ownership.

The numbered explanatory paragraphs in this guide refer to identically numbered sections of the enclosed form.

- 1

The **lessor** is the person who rents the dwelling to the lessee and whose name generally appears on the lease in that capacity.
- 2

Enter the **address of the building**. If the building has more than one street address, enter all the addresses.
- 3

Enter, for each category of dwelling, the total monthly rents that apply for the month of December 2022. Estimate the rents of vacant dwellings and of dwellings occupied by the lessor according to the rents charged for comparable leased dwellings. The rent includes any supplementary charges paid for by the lessees, for instance the charges paid for parking.

If the lease is meant for land intended for the installation of a mobile home, the word **dwelling** has to be replaced by **land**.
- 4

The **non-residential premises** are those used for commercial, professional, industrial or arts and crafts purposes. If there are such premises in the building, enter the December 2022 rents and estimate a normal rent for the non-rented premises. At the hearing, you must be ready to indicate the proportion of energy costs, maintenance costs and service costs that apply to the non-residential premises.

- 5

Enter the annual amount of revenue **other than the revenue collected** regularly from the lessees of the building, for instance, revenue from a laundromat or parking spaces (from people other than lessees of the building). Do not include the revenue of operation of non-residential premises for which the rents are declared in section 4.
- 6

Enter the amount of all **municipal taxes** (including service taxes) and **school taxes** billed for the building.
- 7

Enter the cost, for a maximum period of 12 months, of the policy for **fire and liability insurance** in force on December 31, 2022 and the cost for the policy in force on December 31, 2021.
- 8

Energy costs are those that are paid by you, for the usage of the dwellings, non-residential premises and common areas of the building, notably for the heating, electricity consumption or hot water.

If energy costs apply to some but not all the dwellings, you must be ready to indicate, at the hearing, which dwellings are affected.

9

Maintenance costs are those that are paid by you for minor repairs and upkeep of the building, the dwellings, the groundskeeping and of the installations that benefit the lessees. Consider the products necessary for maintenance, materials used for minor repairs, expenditures related to snow removal (in the case of a mobile home park, enter the costs in the appropriate boxes), minor carpentry and painting work, the maintenance of the grounds, the plumbing, the heating system, electrical wiring, elevators, washers and dryers, stoves and refrigerators, pool and machinery. Consider also the wages of employees who carry out the work and maintain the building (e.g., janitor) as well as fees due in virtue of a service contract (e.g., electrician, plumber).

Enter expenditures for the building as a whole, even if non-residential premises are located in it.

10

The **service costs** are those that are paid by you, and provide the lessees with services included in the lease such as security, food, personal care, etc. These expenditures include the cost of employees providing the services (e.g., security guard, cook, nurse, care giver, doorman) whether the employees work for the lessor or are engaged by way of a service contract. Service costs include the cost of inherently related products (e.g., food, nursing products).

Do not include operating costs for a **new service** put in place during the reference period. These costs must be entered in column "Operating expenses resulting from the installation of the new service" of section 12.

11

Management costs will be established, when the rent is calculated, at 5% of the annual revenue of the building, so that the lessor does not have to keep track of minor expenses and assess the value of the time he spends in the administration of the building. You have nothing to enter and no proof to submit for these costs to be considered.

Nevertheless, **upon filing of supporting documentation**, administration costs of up to 10% of the building's revenue may be allowed. These fees apply in particular to management contracts, salaries or administrative personnel, office expenses, advertising and book-keeping.

If you declare such costs, don't include interest and reimbursement of capital, capital cost allowance, cost relating to the sale or acquisition of a building and those pertaining to the mortgage renewal.

12

Major repairs or improvements are considered as **capital expenditures**. They are paid by you and are not part of the general operation expenses. They may be expenditures for repairing or modifying the major components of the structure of the building (e.g., roof, plumbing, heating system, insulation, windows), for renovating (e.g., major carpentry and painting work) in the dwellings, common areas or added secondary installations (e.g., parking, pool).

Besides the capital expenditures, it is possible that you have to pay for **new operating expenses** following the installation of a service. For instance, when installing a swimming pool or a garage, new operating expenses apply, or when providing a new service to the lessees, wages of employees must be paid for. You must estimate the cost of these new operating expenses for a full year.

If capital expenditures or new operating expenses apply to some but not all of the dwellings, you must be ready to specify, at the hearing, which dwellings are affected.

As far as possible, enter one expenditure per line. However, if more space is needed, you can group together the expenditures that benefit to the same dwellings.

13

Enter the amount of any **subsidy** that you received for financing **major repairs or improvements** entered in section 12.

If you have benefited from a reduced interest loan concerning these expenditures, you must give the specifics at the hearing namely the amount of the loan and the annual payments.

Useful information may be found in the documents attesting to your agreement with the Canada Mortgage and Housing Corporation (CMHC), the Société d'habitation du Québec (SHQ) or your municipality.

Indicate the amounts of any **subsidies** received or to be received, in connection with a **major repair or renovation** entered in section 12.
